Flight Simulation • Training • Education • Safety

The Small Footprint Simulator training pod is an affordable, mid-level training simulator that can be used for all types of training and testing. The simulator includes several control features and operators out of the box, just plug in in and it's operational.

Benefits

- Multiple technologies
- Rapid deployment
- Comes completely assembled
- Mobile, very easy to move
- Plug & Go one source power
- Rolls through standard doors
- Cross training functionality
- Ruggedized

Each Small Footprint Simulator is built out of sturdy ruggedized, lightweight aircraft aluminum, recessed wheels for relocation and uniform computer hardware for simplified updating maintenance and wiring that is simplified to a single plugin.
